CURVED STAIRCASES

Stannah

**"600,000 people worldwide have
chosen a Stannah stairlift to help
them keep their independence"**

Stannah. Step into freedom

Life is better when you have the energy to do the things you want to do, like enjoying a visit from the grandchildren or entertaining friends. Our experience has taught us that the sooner a stairlift is installed, the sooner you will be able to start appreciating the things you love doing. So, just imagine how a stairlift from Stannah could make your day-to-day life easier, safer and more enjoyable.

The perfect stairlift for you and your home

Stannah know that not all homes are the same. If you think your stairs are unsuitable for a stairlift, we think you might be pleasantly surprised. Our slimline rails and one-step fold-away chair leaves enough space for others to use the staircase and, contrary to belief, our rails are fitted to the staircase and not the wall.

This ensures that when you have your Sofia stairlift installed by our friendly and professional engineers, it will be quick, easy and carried out with minimal fuss and bother.

Stannah, a company trusted for over 150 years

We are a family-run company and have been for five generations. The current managing directors are the great, great grandchildren of Joseph Stannah, who started the company in the 1860s. His engineering principles and strong family values run as true today as they always have.

Sleek and smooth

Safely seated with the easy-to-use seatbelt on, a gentle touch of the controls is all it takes to climb your stairs.

Neat, elegant and tidy

Our elegant curved rails and fold-flat chair design leaves your hallway looking spacious and tidy with plenty of space for other stair-users.

Sofia. Tailored to you and your stairs

Stannah understand that every curved staircase is different from the next, with its own landings, angles and corners. So we custom-design the curved rail on your Sofia, making it to measure so it fits your stairs precisely. Together with your chosen colours on the chair and rail, it all adds up to your perfect stairlift.

Comfort and style

The Sofia offers the classic Stannah blend of comfort, safety and style. Along with its smooth and flowing contours, the deeply upholstered chair comes in a choice of fabrics, leathers and vinyls all of which look and feel inviting. Settle into the supportive seat, put on your easy-to-use seatbelt and move the controls to glide up or down your stairs – it's that simple. A one-step fold-away function lets you neatly fold the chair to create extra space, while a seat-safety sensor stops your stairlift moving until you are safely seated. You can also lock your Sofia using the integral control key to keep it safe from children. For those who have limited strength in their hands, you can also choose an optional one or two-way powered swivel seat which is designed for narrow hallways, that turns to face your landing or hall, making getting in and out of your Sofia easy.

Rails that follow every twist and turn

Your made-to-measure curved rail neatly hugs every corner of your stairs, while its elegant design harmonises with any home. The slimline profile of the rail also leaves space on your stairs for others to safely use them, while its twin-tube design makes it exceptionally strong and stable. The rail is fixed to your stairs rather than the walls. The rail fits to either side of the staircase, depending on space.

Naturally follows every curve

The bespoke Sofia rail can be fitted to either side of the staircase - if space allows.

Easy to get on and off

The one-way manual or optional one or two-way powered swivel seat allows you to get on and off your Sofia safely and easily.

"The sales advisor took great care measuring my staircase to ensure a perfect fit"

**"My Sofia is so easy to use.
The controls are simple and need
only the lightest of touches"**

Sofia. Made to make your life easy

Your safety and comfort mean everything to Stannah. This is why we have designed the Sofia for complete peace-of-mind, giving it a range of helpful features that make it safe, easy and enjoyable to use.

Below are the benefits and features common to the Stannah Sofia for curved stairs.

1. Comfortable and stylish chair

The Sofia offers stylish comfort, with a cushioned back and generously upholstered, padded seat available in hard-wearing woven, supple leather or durable vinyl upholstery all of which are fire retardant, and available in a choice of contemporary colours to match your décor.

2. Adjustable arms with intuitive controls and removable key

At the point of installation, you can have the armrests of your Sofia adjusted to size for extra comfort. To operate your Sofia, gently move the controls in the direction you wish to travel. The controls also act as a key to lock your stairlift. This feature is particularly useful as it prevents other people from using the stairlift, e.g. young children.

3. One-step fold-away and removable link bars*

Flip-up the arms or the seat and the footrest follows, folding flat for more space on your stairs. If you need side access from a wheelchair, the link bars can be removed, enabling you to move safely and easily onto the chair.

* (By removing the link bars this eliminates the one-step fold-away option)

4. Easy-to-use swivel levers

Use the standard easy-to-operate manual swivel lever, or for those with limited strength in their hands, the optional one or two-way powered swivel, to get off your stairlift in the safest position at the top or bottom of your stairs.

5. Safety edges

Safety sensors around the footrest and carriage automatically detect any obstruction on your stairs, bringing your Sofia to a safe and gentle stop.

6. Easy-to-use seatbelt

Use the specifically designed seatbelt which can be fastened simply and easily with one hand.

7. Seat safety sensor

A sensor within the seat ensures your stairlift won't move until you're safely settled in your chair.

Model shown opposite is the Sofia for curved stairs in Red Woven upholstery with optional one or two-way powered swivel seat

Sofia. Your step-by-step guide

We believe a stairlift should go beyond the functional to become a seamless part of a more rewarding life. To us, that means making it beautifully simple to operate.

1. Your Sofia can be folded flat against the wall when it's not in use, giving you more space.

2. To unfold your Sofia, just lower the arms or the seat and the footrest unfolds too.

3. A gentle movement of the controls is all it takes to make your Sofia glide effortlessly upstairs or downstairs.

4. When you arrive at the top of the stairs, you can swivel your Sofia around so you can get off safely.

5. When not in use your Sofia can be left in the swivelled position as a safety barrier, or fold it flat against the wall.

6. Using the wall-mounted remote control, you can send and receive your Sofia to either end of the stairs.

“My Sofia seatbelt gives me the extra reassurance I like to have when I’m using my stairlift”

“The Stannah engineer adjusted the armrests to suit me, making my Sofia even more comfortable”

Sofia. Created just for you

No two people are ever identical, that's why as well as our standard features we also have a number of optional features which can be tailored to you.

Retractable seat belt

Our retractable seat belt is easy to use and can be fastened with one hand.

Powered Swivel (Optional)

Optional one or two-way powered swivel seat allows you to get on and off safely.

Tailor-made just for your stairs

Your Sofia curved rail is custom made just for your stairs, so it fits perfectly.

Footrest fold button (Optional)

The one-touch, footrest-fold button helps you to raise or lower the footrest.

Adjustable armrests

The armrest length on your Sofia can be adjusted to suit you perfectly.

Horizontal finish

If space allows, your rail can be extended around onto your landing for extra safety.

“I wanted my stairlift to look at home in my house. My Sofia blends in perfectly”
