STAIRLIFT

CURVED STAIRCASES

Stannah

"600,000 people worldwide have chosen a Stannah stairlift to help them keep their independence"

Stannah. Enjoy freedom in your home

Life is better when you have the energy to do the things you want to do, like enjoying a visit from the grandchildren or entertaining friends. Our experience has taught us that the sooner a stairlift is installed, the sooner you will be able to start appreciating the things you love doing. So, just imagine how a stairlift from Stannah could make your day-to-day life easier, safer and more enjoyable.

The stairlift that fits your life and home perfectly

Stannah know that not all homes are the same. If you think your stairs are unsuitable for a stairlift, we think you might be pleasantly surprised. Our slimline rail and one-step fold-away chair leaves enough space for others to use the staircase and, contrary to belief, our rails are fitted to the staircase and not the wall. This ensures that when you have your Solus stairlift installed by our friendly and professional engineers, it will be quick, easy and carried out with minimal fuss and bother.

Stannah, a company trusted for over 150 years

We are a family-run company and have been for five generations. The current managing directors are the great, great grandchildren of Joseph Stannah, who started the company in the 1860s. His engineering principles and strong family values run as true today as they always have.

Sleek and smooth

Safely seated with the easy-to-use seatbelt on, a gentle touch of the controls is all it takes to climb your stairs.

Neat, elegant and tidy

Our elegant curved rails and fold-flat chair design leaves your hallway looking spacious and tidy with plenty of space for other stair-users.

Solus. Custom-designed to suit you

Stannah understand that every curved staircase is different from the next, with its own landings, angles and corners. So we custom-design the curved rail on your Solus, making it to measure so it fits your stairs precisely. Together with your chosen colours on the chair and rail, it all adds up to your perfect stairlift.

Modern looks to match your home

With its smart looks and stylish seat in a choice of modern fabrics, leathers and vinyls, the Solus blends in beautifully with your home. Just sit in the comfortable and supportive seat, put on your easy-to-use seatbelt and gently move the controls to glide up or down the stairs – nothing could be simpler. Your stairlift features a seat-safety sensor that prevents it from moving until you are safely seated, as well as a built-in control key to lock it and keep it safe from children. The one-step fold-away function also lets you neatly fold the chair flat for extra space. For those who have limited strength in their hands, you can also choose an optional one or two-way powered swivel seat which is designed for narrow hallways, that turns to face your landing or hall, making getting in and out of your Solus easy.

Rails that follow every twist and turn

Your made-to-measure curved rail neatly hugs every corner of your stairs, while its elegant design harmonises with any home. The slimline profile of the rail also leaves space on your stairs for others to safely use them, while its twin-tube design makes it exceptionally strong and stable. The rail is fixed to your stairs rather than the walls. The rail fits to the either side of your staircase, depending on space.

Naturally follows every curve

The bespoke Solus rail can be fitted to either side of the staircase - if space allows.

Simple and safe to get on and off

The one-way manual or optional one or two-way powered swivel seat allows you to get on and off your Solus safely and easily.

“The sales advisor was meticulous in measuring my staircase, so I knew my Solus would fit perfectly”

“My Solus couldn’t be easier to use thanks to the simple and light-touch controls”

Solus. Safety and comfort in harmony

We value your safety and comfort more than anything else. This is why the Solus comes with a host of thoughtful touches and features that make it a joy to use and give you complete peace-of-mind.

Below are the benefits and features common to the Stannah Solus for curved stairs.

1. Comfortable and stylish chair

The Solus offers stylish comfort, with a cushioned back and generously upholstered, padded seat available in hard-wearing woven, supple leather or durable vinyl upholstery all of which are fire retardant, and available in a choice of contemporary colours to match your décor.

2. Adjustable arms with intuitive controls and removable key

At the point of installation, you can have the armrests of your Solus adjusted to size for extra comfort. To operate your Solus, gently move the controls in the direction you wish to travel. The controls also act as a key to lock your stairlift. This feature is particularly useful as it prevents other people from using the stairlift, e.g. young children.

3. One-step fold-away and removable link bars*

Flip-up the arms or the seat and the footrest follows, folding flat for more space on your stairs. If you need side access from a wheelchair, the link bars can be removed, enabling you to move safely and easily onto the chair.

* (By removing the link bars this eliminates the one-step fold-away option)

4. Easy-to-use swivel levers

Use the standard easy-to-operate manual swivel lever, or for those with limited strength in their hands, the optional one or two-way powered swivel, to get off your stairlift in the safest position at the top or bottom of your stairs.

5. Safety edges

Safety sensors around the footrest and carriage automatically detect any obstruction on your stairs, bringing your Solus to a safe and gentle stop.

6. Easy-to-use seatbelt

Use the specifically designed seatbelt which can be fastened simply and easily with one hand.

7. Seat safety sensor

A sensor within the seat ensures your stairlift won't move until you're safely settled in your chair.

Model shown opposite is the Solus for curved stairs in Slate Leather upholstery with optional one or two-way powered swivel seat

Solus. Your step-by-step guide

We believe a stairlift should go beyond the functional. To us, that means making it beautifully simple to operate.

1. Your Solus can be folded flat against the wall when it's not in use, giving you more space.

2. To unfold your Solus, just lower the arms or the seat and the footrest unfolds too.

3. A gentle movement of the controls is all it takes to make your Solus glide effortlessly upstairs or downstairs.

4. When you arrive at the top of the stairs, you can swivel your Solus around so you can get off safely.

5. When not in use your Solus can be left in the swivelled position as a safety barrier, or fold it flat against the wall.

6. Using the wall-mounted remote control, you can send and receive your Solus to either end of the stairs.

**“My Solus seatbelt really puts
my mind at ease when I’m using
my stairlift”**

“I was impressed the armrests on my Solus could be adjusted to suit me. It really adds to my comfort”

Solus. As individual as you are

No two people are ever identical, that’s why as well as our standard features we also have a number of optional features which can be tailored to you.

Retractable seat belt

Our retractable seat belt is easy to use and can be fastened with one hand.

Safety edges

Your Solus will automatically stop if it meets an obstruction on your stairs.

Horizontal finish

If space allows, your rail can be extended around onto your landing.

Footrest fold button (Optional)

The one-touch, footrest-fold button helps you to raise or lower the footrest.

Remote wall controls

Your Solus can be called to either end of your stairs by using the wall control.

Tailor-made for just your stairs

Your Solus curved rail is custom made for just your stairs, so it fits perfectly.

“I love my home, so it’s important my stairlift blended with my hallway. The Solus looks perfect”

Solus. Colours in unison with you
